(732)208-4355 | Piscataway, New Jersey | dylanabry1206@gmail.com | [LinkedIn](#) | [Itch.io](#) | [GitHub](#)

Summary

I am a Computer Science graduate and MLB Quality Assurance Tester with experience in software debugging, defect investigation, Unity/C# and Unreal/C++ development, and cross-functional engineering collaboration. Experienced in isolating complex application defects, developing reliable reproduction steps, executing release test plans, and building production-scale gameplay systems. Seeking opportunities as a software engineer, associate producer or technical designer.

Experience

QUALITY ASSURANCE | Major League Baseball (MLB) New York, New York | 06/2026 - Current

- Perform system, regression, and functional testing across MLB game and XR products, including *Home Run Derby VR* and *MLB The Show Mobile*, across Meta Quest 3, Apple Vision Pro, iPhone, PC, and PlayStation.
- Identified and reproduced **42** bugs across MLB XR, establishing reliable reproduction steps that supported engineering investigation and contributed to a reduction in unexpected application behavior and crashes.
- Diagnosed and reproduced long-standing defects that had remained unresolved for months, providing engineers with reliable reproduction steps, technical observations, and supporting evidence through Jira.
- Executed an end-to-end release test plan for MLB XR, validating functionality and stability ahead of a successful production launch to the Quest app store.

GAME DEVELOPMENT INSTRUCTOR | Create & Learn - Palo Alto, California | 03/2026 - Current

- Lead live virtual instruction in Unity/C#, Roblox Studio/Lua, Scratch, and Java, teaching game development and programming fundamentals
- Adapt lessons to varying skill levels, guiding students through hands-on projects and problem-solving

UNITY SOFTWARE DEVELOPER INTERN | Castix LLC - Dallas, Texas | 07/2025 - 12/2025

- Enhanced NPC interaction in a Unity RPG, "Medieval Lands", improving dialogue flow through UI redesign
- Developed and tested gameplay systems via TestFlight and provided feedback to team members using GitHub

Projects

The Alchemist Auction - Strategy/RPG Game (Unity, C#) | Solo Project June 2025 - April 2026

[Link to Game](#)

- Developed a large-scale turn-based strategy/RPG system combining auction mechanics, AI-driven decision making, and multi-phase boss combat using state-based logic
- Engineered complex gameplay systems including Dictionaries/Lists transactions, UI/interaction systems, persistent progression (PlayerPrefs), and an interactive hub with integrated minigames and animation/video/audio systems

Pyrokour - 3D Platformer (Unity, C#) | Team Project (3 Developers) January 2026 - April 2026

[Link to Game](#)

- Led a 3-person team across development of a physics-based 3D platformer, including gameplay systems, player movement, and camera design using Cinemachine
- Engineered interactive environments using Rigidbody physics, collisions, triggers, prefabs, and particle/animation systems while managing Git-based collaboration

Skills

Languages

- C#, C++, Java, Python

Game Engines & Technologies

- Unity Game Engine (Gameplay Systems, UI, State Machines, ProBuilder, Cinemachine, Animation, Event Systems, NavMesh, Behavior Graphs, XR Interaction Toolkit)
- Unreal Game Engine (AI Systems/Behavior Trees, Pawn/Character Classes, Blueprint Scripting, C++ Integration, Physics & Collision Systems)
- Game AI & Probability-Based Decision Systems
- VR Performance Optimization

Fundamentals

- Data Structures & Algorithms
- Software Testing & Debugging
- OOP Design Patterns

Software and Tools

- GitHub/Version Control
- Audio Editing (Audacity)
- Blender
- Jira

Additional

- Team Collaboration & Project Management

Education and Training

Rutgers University - New Brunswick, NJ | Bachelor of Science | Computer Science, Minor in Cognitive Science, 05/2026

- **3.70** GPA (Graduated magna cum laude)
- Hack RU (Hackathon) Spring 2025

Raritan Valley Community College - Somerville, NJ | Associate of Science | Mathematics, 05/2024

- **4.0** GPA (Graduated summa cum laude)
- "Is Learning From Playing a Video Game as Effective as Reading a Textbook?" Capstone Research Project
